

ZAID PARKAR

SOFTWARE DEVELOPER | AUTOMATION DEVELOPER

Dubai, UAE (no relocation required) | +971 58 298 4371 | zaidparker901@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

SUMMARY

Software and automation developer with 2+ years shipping production systems that replaced manual business processes end-to-end — cutting a core ERP quotation workflow 85–90% and reclaiming 10+ hours of manual work every week. Designed and shipped a self-updating developer portfolio (Next.js, React, TypeScript) that reads live from the GitHub API. Currently completing an MBA in Data Science while building an HR analytics platform combining statistical testing and financial modeling. Based in Dubai, UAE — no relocation required.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, Kotlin, C#, SQL, HTML/CSS

Web & Frontend: React, Next.js, Tailwind CSS — shipped in production on [nyxen.website](#)

Data & Databases: PostgreSQL, MongoDB, SQL, Streamlit, Power BI

Automation & Integration: UiPath, Google Apps Script, Google Sheets API, WhatsApp Business API, ERP integration, OCR/PDF processing

Platforms & Tools: Git/GitHub, AWS, VS Code

PROFESSIONAL EXPERIENCE

Automation Developer — Satchitanand Jigs and Fixtures, Pune, India

2024 – 2026

- Automated end-to-end ERP quotation generation from spreadsheet data, cutting turnaround 85–90% (10–15 min → 1–2 min).
- Automated Google Sheets data retrieval and validation feeding ERP quotation generation, saving 10+ hours of manual work per week.
- Shipped 6+ production automation systems in UiPath and Python across sales, finance, HR, and procurement, minimizing manual intervention.
- Built OCR-based PDF processing for invoices and documents, improving reporting accuracy across invoice processing, sales reporting, and BOM extraction.
- Built a self-routing Leave Management bot in Google Apps Script (JavaScript) — requests to move automatically between manager, HR, and employee over the WhatsApp Business API with no manual follow-up.
- Wrote Python automation to process email attachments, extract ZIP files, print documents, and archive completed jobs, removing a standing manual task.

PROJECTS

NYXEN — Personal Developer Portfolio — [nyxen.website](#)

- Built and deployed a self-updating portfolio in Next.js, TypeScript, and Tailwind that reads live from the GitHub API — publishing a new project needs no code change or redeployment.

Employee Attendance Analytics Platform — MBA Project

- Built an end-to-end HR analytics platform in Python and Streamlit combining statistical hypothesis testing and financial impact modeling to surface performance correlations and ROI-driven intervention strategies.

FoodScape — Android Food Donation App — Last Year Project

- Built and shipped a full Android app in Kotlin for a partner NGO — UI, core logic, and data layer — through to a stable, testable release.

EDUCATION

MBA, Data Science — Lovely Professional University

2024 – Present

B.Sc. Computer Science — R.P. Gogate College of Arts & Science (Autonomous) | CGPA 9.1/10

2021 – 2024

CERTIFICATIONS & LANGUAGES

UiPath Academic Alliance Certification
